

Weekly report (2013.10.21~10.27)

Done

- 1) Modify the ppt for HPC presentation after discuss with Prof. Zhang.
- 2) Prepare for toefl.
- 3) For VisNgin, Tianye still struggling for extracting the earth-rendering part out of VisNgin. There are many reasons for such a low efficiency. I think I may have distributed a task that is too hard for Tianye to complete alone, he knows little about OpenGL and Qt, also he need some time for class. When I back from HPC, I'll work together with Tianye to finish this task.
- 4) Modify the textbook of Computer Game according to the suggestions. Add an example for forward/backward kinematics. Add some content for the compression of character animation. Also make some changes to make the content fit the new chapter name.

To Do

- 1) HPC: 10.28-10.31.
- 2) Work on VisNgin.
